OXY-ACETYLENE OUTFITS

METALMASTER™

PROFESSIONAL MEDIUM DUTY WELDING AND CUTTING OUTFIT

CAPACITY

Cutting up to 6" (150mm)
Welding up to 3/8" (9mm) steel

FEATURES

Brass & stainless steel construction
torch handle with two stainless steel
needle valves for fast accurate flame
adjustment.
O-ring seals.
Forged and extruded brass for durability.
External torch mounted reverse flow
check valves.
Complete accessory package, hose,
lighter & goggles.

APPLICATIONS

Precise welding, brazing, soldering,
hard facing, heat/treating and priming,
straightening, deseaming and scarfing,
gouging, flame cleaning, rivet washing
and cutting.

CUTTING TIPS

PowerWeld tips are precision machined from high quality copper alloys for durability. The gas passages for single piece acetylene tips are accurately swage-forged and shaped on polished mandrels for smooth, efficient gas flow. Two piece tips for alternate fuel gases feature an internal spline configuration that is of the latest design, offering the optimum in cutting performance. All tips are 100% flame tested.

REPLACEMENT GAUGES

- Premium quality replacement gauges are the industry standard.
- Polished drawn brass with one-piece impact resistant polycarbonate posilock lens.
- For use with compressed gas regulators, these gauges are an excellent choice for original equipment and replacement applications.
- Gauges are UL listed.

PW-500PT Propane Multi-Torch

Can be used wherever a large volume of heat is needed. Uses: weed burning, drying, thawing frozen pipes and equipment, melting snow, ice, asphalt repair, removal of parking lot markings, paint removal plus many other applications. Runs on standard clean burning propane gas. Connects to standard LP cylinders - no regulator required. Torch produces 500,000 BTU of heat. Solid steel head, 30" handle and solid brass needle control valve. Included with the torch is a 10' CSA approved LPG hose assy, POL excess flow control connector, and a single flint striker. PROPANE TORCHES

PW506
 PROPANE HEATING TORCH
 Uses include:
 Soldering, Brazing, Annealing, Straightening and Bending Plates, Pipes and Bars
 Preheating in Welding Jobs, Drying Molds, Thawing Jobs, Roofing and Asphalt Work.
 Includes three heating heads.
 Length: 500mm
 Head size: 25mm, 38mm, 50mm

PW507
 PROPANE HEATING TORCH
 Brass tube with stainless heating nozzle
 Used for applications requiring large volumes heat.
 At the pressure lever, operator can go from pilot flame to full-brush flame
 Length: 860mm
 Head size: 60mm

PROPANE REGULATOR

GR-333
 HIGH PRESSURE PROPANE REGULATOR
 Delivery pressure adjustable from 0-30 psi
 Inlet - CGA-510 POL connection with excess flow control
 Outlet 9/16"-18 L.H. male "B" connection
 Capacity 1,500,000 BTU/hr
 Suitable for torches, construction heaters, tar pots and other industrial applications

PROPANE EQUIPMENT

AUTO IGNITE PROPANE TORCH

Self-igniting torch for use with propane or MAPP® gas. Instant on/off trigger igniter for simple one hand operation. Adjustable swirl flame control knob. Durable cast aluminum body. Lock button to maintain flame. Compatible with small disposable cylinders - CGA-600 connection.

CABLE CONNECTORS

Designed to efficiently conduct the current through a detachable type connector. Brass bodies are precision machined. Cam action design allows lock in with a twist and pulls the two halves together tightly. Connector covers are resistant to heat, cold, abrasion, ozone, oils & solvents. Tapered ends lock out moisture, oil and dirt. Connector covers are specially compounded to be flame retardant.

WELDING CABLE

Convenient Cut Length Cable in Boxes

PowerWeld carries inventory of the most popular welding and primary cable sizes in convenient pre-cut lengths of 50' and 100'. These lengths are attractively boxed and ready to go right off the shelf for clean and trouble free cable sales.

Flex-a-Prene® 30 AWG 600 volt all-weather grade welding cable is rated at -50°C to +105°C giving it outstanding cold weather flexibility. Made with a special jacketing compound, this standard stock welding cable gives you high flexibility without sacrificing weather resistance. **Flex-a-Prene®** welding cable is the first to meet **SAE J1127**, a standard that requires a minimum amount of copper per gauge. To meet this standard, the cable must also pass extensive tests against flame, heat, and cold. These conditions are similar to what welders experience on a daily basis.

MIG FLUX CORED WELDER

GAS / NO GAS

COMES COMPLETE WITH:

- Gun and cable assembly
- 6 ft (1.8 m) work cable with clamp
- Argon Flowmeter with hose
- Sample spool of .030 in (0.8 mm) self shielding flux cored wire.
- Spare contact tips
- 6 ft (1.8 m) Power cord with plug.
- Instruction Manual

Dimensions: 18" (470mm) x 9.4" (240mm) x 12.0" (305mm)

Net Weight: 59 lb (27 kg)

Warranty: Two Years

Description: **MM-180E** wire feed welder is designed for maintenance and sheet metal fabrication. The welder consists of a single-phase power transformer, stabilizer, rectifier, and a unique built-in control/feeder. You can weld sheet metal from 24 gauge up to 1/4" thick with a single pass. You can weld thicker steel with bevelling and multiple pass techniques. Tweco® style nozzles and contact tips.

HC40PLUS is an IGBT inverter plasma cutter with thermal overload protection, a Trafimet® torch and a built-in gas regulator. This easy to use plasma cutter has the power to cut up to 3/8" materials and a pilot arc that makes cutting expanded metal possible. This machine requires single phase 230 Volt (220V-240V), 60 Hz input power.

TUNGSTEN ELECTRODES

PowerWeld offers eight types of tungsten electrode to cover every TIG welding application. Electrodes are 7" (175mm) in length and packaged 10 rods per box. All tungstens have color coded tips for easy identification, and meet AWS A5.12 specifications. Electrodes are supplied with a smooth, round, bright centerless ground finish.

MILD STEEL WIRE & COPPER FREE WIRE

Certified by CWB to CSA W48-Class ER49S-6

Specifications

AWS A5.18 Class ER70S-6

Description

S6 contains high levels of manganese and silicon for stronger deoxidizing power where stringent cleaning procedures are not possible. This wire has been designed to provide X-ray quality porosity-free welds and the highest tensile strength (as welded) of the plain carbon steel wires. The high silicon content increases the fluidity of the weld pool, creating a smoother bead appearance and resulting in minimal post-weld grinding. S6 is excellent where poor fit-ups or rusty and oily plates may be used.

Wire is precision level layer wound.

Applications

Construction work, tanks, truck bodies, farm implements, pipes, steel castings or forgings, shaft build-ups and general shop fabrications.

FLUX CORED WIRE

E71T-GS ALL POSITION

SELF-SHIELDING - GASLESS

Features

- No Shielding Gas Needed
- Single Pass Welding of Thin Gauge Galvanized Steel
- Excellent for Outdoor Use
- Smooth Arc – Minimal Spatter
- DC- Straight Polarity
- Works Well In Wind

Description

PowerWeld gasless wire E71T-GS is an all-position, self-shielded flux-cored wire designed for single pass fillet and lap welding on galvanized or carbon steel as thin as 20 gauge, without burn-through. Gasless wire E71T-GS is commonly used on small portable 110 volt welding machines, offering smooth arc action with very little spatter. Travel speed is fast, penetration is good and slag removal is easy.

Applications

PowerWeld gasless wire E71T-GS is most popular for the home workshop welder because it works so well on 110 volt machines and can be used on thin gauge steel. Gasless wire E71T-GS is used quite extensively in automobile body shops for door or body repairs and it is also used for sheet metal duct work on lap and butt joints.

NOTE: As with all self-shielded wires, **PowerWeld** gasless wire E71T-GS does contain fluoride compounds, which require more attention to ventilation when being used to weld galvanized steel. The zinc oxide formed during welding should not be inhaled as it can cause metal fume fever. When welding indoors or in an enclosed area, be sure that the ventilation is adequate.

E71T-1C/1M ALL POSITION

PowerWeld E71T-1C/1M is a rutile type flux cored wire designed for general purpose all position welding with 100% CO2 or a 80% Argon – 20% CO2 mixture shielding gas. Features excellent welding performance and higher welding efficiency than traditional welding wires with it's smooth arc characteristics, while producing low spatter and low fume emissions. Used for single and multiple pass welding of mild steel and 490 Mpa (70,000 psi) grade high tensile steel. Applications include structural steel fabrication, pressure vessels, bridges, machinery etc.

- Classification: E71T-1C/1M per AWS A5.20, ASME SFA5.20

MILD STEEL ELECTRODES

PowerWeld 6013

PowerWeld 6013 is a high titania coated electrode. This electrode provides good wetting and shallow penetration for thin sheet metal applications (using smaller diameter electrodes), but with sufficient penetration for welding medium gauge steel. PowerWeld 6013 is an all-purpose electrode that provides a soft steady arc which is easily regenerated, easy slag control for vertical-down welding, low spatter and a beautiful bead appearance. PowerWeld 6013 electrodes may be used in any position with AC or DC (straight or reverse polarity).

Applications

PowerWeld 6013 is commonly used for automobile bodies, truck frames and bodies, ornamental iron, metal furniture, farm implementations, machinery guards, storage tanks, or wherever appearance is important or desirable.

PowerWeld 7014

PowerWeld 7014 is an iron power, rutile type electrode providing high deposition rates and fast travel speed. This electrode provides a stable arc, flat smooth bead appearance and easy slag removability. PowerWeld 7014 is used for all position, single-pass and multi-layer welding applications. AC or DC (straight or reverse polarity) may be used.

Applications

Typical applications include: ship structures, bridges, structural steel for buildings, sheet metal, ornamental iron, auto bodies and fenders, machine parts, storage tanks, etc.

LOW HYDROGEN ELECTRODES

PowerWeld 7018

PowerWeld 7018 is a low-hydrogen electrode for use in all positions on low, medium and high-carbon steels. 70,000 PSI tensile strength. Ideal for out of position welding and tacking. Runs on AC or DCEP (reverse) polarity. Features a steady arc with low spatter and medium penetration, providing X-ray quality weld deposits.

Applications

PowerWeld 7018 is typically used for heavy machinery fabrication, pressure vessels, field and shop welding of bridges and structural steels, cast steels and shipbuilding, or most ASTM specifications on medium carbon and low alloy steels.

PowerWeld 7018AC

PowerWeld 7018AC is a low-hydrogen electrode for use in all positions on low, medium and high-carbons steels. 70,000 PSI tensile strength. Ideal for out of position welding and tacking. Runs on AC or DCEP (reverse) polarity. Specially formulated to operate with small 208/230 volt AC welders.

Applications

Typical applications include general fabrication, tack and skip welds, and for welding thin sections of steel.

STAINLESS MIG WIRE

308L - PowerWeld 308L is used for TIG and MIG welding of unstabilized steels such as types 301, 302, 304, 305, 308. The average carbon content of 0.02% produces a weld deposit with good resistance against intergranular corrosion caused by carbide precipitation. This filler metal is the most popular grade among stainless steels, used for general purpose applications.

309L - PowerWeld 309L is used for the welding of similar alloys in wrought or cast form. It is mostly used for welding dissimilar materials such as mild steel to stainless steel, as well as for a barrier layer in stainless overlays. It has low carbon content of less than 0.03% reduces the possibility of intergranular corrosion. For some applications, welding of straight chromium steels.

316L - PowerWeld 316L is used to weld wrought and cast forms of similar composition, as well as low carbon molybdenum-bearing austenitic alloys. The lower ferrite level of this normal composition reduces the rate of corrosion in certain media and is suitable for use at cryogenic temperatures. The presence of molybdenum increases its creep resistance at elevated temperatures.

All grades meet specification ASME SFA5.9 and are certified by CWB to AWS A5.9

ALUMINUM ALLOYS

Precision made on the latest equipment from materials of the finest quality. **PowerWeld** spooled aluminum wire is triple degreased to provide the highest degree for cleanliness and luster. The **PowerWeld** "shaved finish" produces absolute uniformity in diameter along with excellent surface smoothness so as to guarantee uninterrupted feeding in automatic and semi-automatic operations.

Rigid quality controls in every stage of manufacture and packaging assure maximum welding and brazing efficiency and trouble free welding results. Unique cleaning methods remove all traces for oxides, lubricants and acids. Special packaging maintains absolute cleanliness and prevents contamination.

With state of the art, proprietary processes and advanced testing capabilities, **PowerWeld** is recognized for our quality aluminum welding products.

SWEATBANDS

MODEL	DESCRIPTION
	
PW3100V	PW3200V

Our innovative sweatband design has made wearing a helmet more comfortable, no matter what time of year it is. The pad has been field tested in a variety of industries and is proven to reduce "helmet head", to improve grip, and to provide maximum perspiration absorption. Made of 100% fleecy cotton and flame retardant, this product features an air cushioned inner layer made of thousands of small cells to hold excessive perspiration and a hook & loop fasteners to fit all major brands of suspender (hard hats) or non-suspender (welding and face shields) type headgear.

WELDING CURTAINS & FRAMES

PowerWeld offers a range of curtains designed to protect casual passers-by from harmful radiation in industrial working environments. Arcs and sparks generated from welding and grinding are harmful to the naked eye. **PowerWeld** 14 mil transparent vinyl welding curtains allow those outside of the workspace protection during periods of short-term visibility, dispersing the light generated by the arc while allowing light back into the workspace. All curtains meet CE EN1598-2011, ensuring acceptable transparency, reflectance, IRUV protection and flame resistance. Curtain panels and frames are sold separately.

CHEMICALS

ANTI-SPATTER

Anti-Spatter Nozzle Shield
For Mig gun nozzle and welding surfaces quick dry formula, to save time and reduce cost.

- Reduces spatter build-up on MIG nozzles.
- Prevents spatter adhesion on surface.
- Reduces clean up time.
- Heat-resistant to withstand high temperature use.
- Non-flammable.
- Paint compatible.
- Contains no silicones.
- Contains no fluorocarbons.
- Uses CO2 propellant.
- Private label program available.
- Available in 16 and 24 oz. aerosols.

LUBE PADS & LUBRICANT

LUBE PADS

Wire Lube Pads

Keeps MIG, sub-arc, and flux core cable conduits producing for up to 3 months without down time for cleaning.

Eliminates erratic wire feed caused by dust, particles, and flashing being trapped inside conduit lines.

Increase wire surface feedability. Wire lube pad lowers the coefficient of friction in conduits approximately 60% and increases life of wire feed units.

Pretreatment of wire lube pads so they will not dry out or evaporate.

Contains no solvents, abrasives, carbon, sulfur, nitrogen, moly disulfide or silicones.

Non-toxic, non-flammable.

Economical and easy to use.

Available in recloseable plastic boxes, 4 or 6 pads to a box with one clip and Econo-Pak of 25 pads with clip.

Wire lube pads can be certified for nuclear welding. Flexibility to use pad on both sides and on any axis. Private label program available.

MODEL	# OF PADS
LUBE4	4

ROUND LUBE PADS

Powerweld's Mig Lube Pads are engineered to apply Powerweld's lubricant (come pretreated). Reapply lubricant as necessary. Lubrication allows smooth feeding of wire with poor cast, excessive helix, rusty surface and long feed liners (over 10').

Features:

Lube pads are pre treated with Powerweld's lubricant.

Lubrication allows smooth feeding of wires with poor cast, helix, rust and long feed liners.

For Aluminum, use Powerweld's Untreated White Pads.

MODEL	SIZE
PW7060	TREATED
PW7061	UNTREATED

LUBRICANT

Powerweld lubricant is specially formulated to re-lubricate welding wire lube pads. Save money by re-using pads, lower production costs by reducing wire feed drag. Removes wire dirt, rust and increases tip and liner life.

MODEL	SIZE
PW7040	8 oz / 236 ml

FILLET WELD GAUGES

PowerWeld fillet weld gauges are precision inspection tools designed to ensure quality and accuracy. Several models to choose from cover many applications.

Features include:

- Precision gauge
- Constructed of rust proof 22 gauge type 304 steel.
- Die blanked to eliminate sharp edges - adds to accuracy.
- Permanently etched lettering for long life and abrasion resistance.

- Angle of preparation, 0° to 60°.
- Excess weld metal (capping size).
- Depth of undercut.
- Depth of pitting.
- Fillet weld throat size.
- Fillet weld length.
- Misalignment (high-low).

MODEL	STYLE
MG-8	BRIDGE CAM

- Check undercut
- Check pit depth
- Check porosity

MODEL	STYLE
MG-5M	PIT DEPTH

- The fillet weld gauge allows fast, accurate measurement of eleven (11) fillet weld sizes: 1/8", 3/16", 1/4", 5/16", 3/8", 7/16", 1/2", 5/8", 3/4", 7/8", and 1", and their metric equivalents, to determine weld sizes, either concave or convex.
- Each gauge blade is made of 1-1/4 "x 4" stainless steel to resist rust and bending.
- Blades are deburred to remove rough edges.
- All sizes and numerals are engraved into the surface for easier reading.

MODEL	STYLE
MG-11	FILLET

- Slim design.
- Changes from standard to metric - simply remove gauge body, turn scales over and replace body.
- Measurements read in standard on one side & metric on opposite side.
- Measures internal alignment of pipe after fit-up/alignment, and cuts radiographic rejects.
- Measures internal misalignment of pipe before and after tacking.
- Measures bevel on end preparation.
- This handy devise even measures scribe lines, socket welds, crown height of welds & fillet weld size.

MODEL	STYLE
WG-06HILO	HI LO

- Accurate readings instantly.
- Easy to read digital display.
- Zero setting at any position.
- Metric / Imperial system conversion any position.
- The digital welding gauge is equipped with an output port.
- Data can be input into a computer or a printer via special connecting cable.

ELECTRODE CANISTERS

Powerweld Electrode Canisters

Powerweld electrode canisters are designed to protect your welding electrodes during transport and storage. Sturdy impact resistant construction holds heated electrodes up to 250°F (121°C). Square sided to stop from rolling around during transportation. Rubber O-ring makes a tight seal and resists moisture from entering the canister. Shape design and coarse thread make removal of the cap easy when wearing welding gloves. Holds up to 10lb (4.54kg) of electrode. Available for 14" (350mm) and 18" (450mm) electrodes. Every canister comes with a carry strap!

PW32000TG

The Powerweld **PW32000TG** handheld tungsten sharpening grinder provides precise preparation of tungsten electrodes. The specialized grinding fixture head is designed to accommodate 6 diameters of tungsten electrodes with the option of four precise grinding angles. Properly sharpened tungsten electrodes produce superior weld quality and reliable arc starting. PW32000TG has grinding, facing and cutting capabilities. A double-sided grinding wheel provides long term performance.

- **Input voltage:** 110V
- **Grinding angles:** 15° / 18° / 22.5° / 30°
- **Tungsten diameters:** 1.0mm, 1.6mm, 2.0mm, 2.4mm, 3.2mm, 4.0mm
