Section 1: Product and Company Identification

**Product Identifier:** PowerWeld Tungsten Electrode

**Product Use:** Non-melting electrodes for Gas Tungsten Arc Welding (GTAW / TIG)

**Item Code:** 1PC_/ 2PC_/ CER_/ ZIR_/ PUR_/ RE_/ LAN15_/ LAN20_/ TM_

**Supplier Name:** PowerWeld Inc.

**Supplier Address:**
2501 Beech Street
Valparaiso, IN 46383

**Supplier Web Address:** www.powerweldinc.com

**Supplier Phone:** 219-462-8700
1-800-826-9073

**Emergency Phone:** CHEMTREC (24 hour) 1-800-424-9300

**Prepared By:** PowerWeld Inc.

**Preparation Date:** 3 December 2015

**Specification:** AWS A5.12M/A5.12:2009

**WHMIS Classification:** D-2A

Section 2: Hazard Identification

**Classification:**
- Specific target organ toxicity; single exposure (kidneys, respiratory system) Category 1
- Specific target organ toxicity; repeated exposure (respiratory system, skin) Category 1
- Hazardous to aquatic environment; acute hazard Category 1
- Hazardous to aquatic environment; chronic hazard Category 1

**Label Elements:**

**Hazard Phrases**
- H317 May cause an allergic skin reaction.
- H320 Causes eye irritation.
- H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- H341 Suspected of causing genetic defects.
- H351 Suspected of causing cancer.
- H370 Causes damage to organs.
- H372 Causes damage to organs through prolonged or repeated exposure.
- H400 Very toxic to aquatic life.
- H410 Very toxic to aquatic life with long-lasting effects.

**Precautionary Statements**
- P201 Obtain special instructions before use.
- P202 Do not handle until all safety precautions have been read and understood.
- P260 Do not breathe dust/fume/gas/mist/vapours/spray.
Wash thoroughly after handling.
Do not eat, drink or smoke when using this product.
Contaminated work clothing should not be allowed out of the workplace.
Avoid release to the environment.
Wear protective gloves/protective clothing/eye protection/face protection.
Use personal protective equipment as required.
In case of inadequate ventilation wear respiratory protection.
If ON SKIN: wash with soap and water. Wash contaminated clothing before reuse. If skin irritation persists, contact a physician.
If INHALED: move person to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration and transport to nearest medical facility for additional treatment.
If IN EYES: immediately flush upper and lower eyelids with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Rest eyes for 30 minutes. If redness, burning, blurred vision or swelling persists, visit nearest medical facility for additional treatment.
If exposed or concerned: seek medical advice or attention.
Call a POISON CENTER or doctor/physician if you feel unwell.

Section 3: Composition/Information on Hazardous Ingredients

Section 4: First-aid Measures

**Inhalation:**
If breathed in, move person to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration and transport to nearest medical facility for additional treatment.

**Ingestion:**
Unlikely due to form or product; however, if ingested, DO NOT induce vomiting. Call physician immediately. Never give anything by mouth to an unconscious person. Risk of product entering the lungs on vomiting after ingestion.

**Eye Contact:**
Immediately flush upper and lower eyelids with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least
15 minutes. Rest eyes for 30 minutes. If redness, burning, blurred vision or swelling persists, visit nearest medical facility for additional treatment.

**Skin Contact:**
Wash with soap and water. Wash contaminated clothing before reuse. If skin burn is present, submerge affected area in cold water until burning sensation ceases. If skin irritation persists, contact a physician.

**Symptoms:**
No first aid measures should be required for unused electrodes; first aid measures are relevant only during welding operations.

NOTE: In all severe cases, contact physician immediately. Local telephone operators can provide number of regional poison control centre.

---

### Section 5: Fire-fighting Measures

*Product is not flammable as shipped. Be cautious when in use as welding arcs and sparks can ignite combustibles.*

### Section 6: Accidental Release Measures

<table>

### Section 7: Handling and Storage

**Handling Procedures and Equipment:**
No special equipment is required when handling product as shipped. For recommended PPE while welding or grinding, see Section 8. Handle in accordance with good industrial hygiene and safety practices. Do not eat, drink or smoke when using this product. Wash hands thoroughly before breaks and at the end of the workday.

**Storage Requirements:**
Packaging and loose tungsten electrodes should be properly labeled in order to identify source materials. Store product away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials.

**Incompatibilities:**
Strong oxidizing agents

**Engineering Controls:**
Good general ventilation is sufficient for product when not in use during the welding process. Ensure proper ventilation and respiratory protection is used when welding, brazing or processing. Respiratory protection is
recommended and information may be found regarding the OSHA STANDARDS (29 CRF 1910.134), as well as CSA Standards Z94.4, along with many other safety standards.

Personal Protective Equipment:

Respiratory: Not required under normal conditions of use. A properly fitting fume respiratory or air supplied respirator should be used when welding in a confined space or work area where local exhaust and/or ventilation does not keep exposure below threshold limits indicated above.

Hands: For contact in form as shipped, no special equipment is required. For use during the welding process, approved welder’s gloves suitable for the appropriate task are recommended to prevent injury from sparks and electric shock.

Eyes: Safety eyewear should be used if exposure is likely. During the welding process, an approved welding helmet or face shield with a filter lens shade 12-14 or higher is recommended. Other persons around the workspace should also be protected by shaded welding screens and eyewear if necessary.

Skin: Approved protection (ie./ welders gloves, apron, sleeves, jacket, etc.) should be worn to prevent injury from sparks and electrical shock during the welding process.

Additional Notes:

Thoriated electrodes contain Thorium which is a naturally occurring radioactive element. Primary hazard lies in the inhalation of dust/fumes. The actual amount of Thorium in the weld fumes depends on the grade of thoriated electrode used, as well as welding parameters. Exposure is negligible under DC supply, but is higher during grinding and AC welding. Normal handling of these electrodes is not expected to result in any significant radiation exposure.

Section 9: Physical and Chemical Properties

Section 11: Toxicological Information
**Skin Contact:**
Arc rays can burn skin; skin cancer has been reported.

**Skin Absorption:**
Not applicable

**Eye Contact:**
Arc rays can injure eyes.

**Inhalation:**
Inhalation is the most likely route of exposure; refer to “Effects of Acute Exposure” and “Effects of Chronic Exposure” below.

**Ingestion:**
Unlikely due to form of product.

**Effects of Acute Exposure:**
Radiant energy can produce “flash burns” of eyes and skin. Electric shock can kill. Overexposure or inhalation of large amounts of welding fumes may cause symptoms such as metal fume fever, dizziness, nausea, dryness and irritation of your nose, throat or eyes as well as lung disease.

**Effects of Chronic Exposure:**
Overexposure or prolonged inhalation of large amounts of welding fumes may cause bronchitis or cancer. Other overexposure or prolonged inhalation of large amounts of welding fumes symptoms may include damage to the central nervous system, respiratory system, skin and could affect organs such as pancreas and liver. Deposits could enter lungs impairing lung function and causing possible irreversible tissue damage.

**Irritancy of Product:**
Tungsten is a mild irritant to eyes and skin.

**Carcinogenicity:**
Thorium is radioactive and is a National Toxicology Program known carcinogen.

**Reproductive Effects:**
None known

**Toxicological Data:**
Not available

---

### Section 12: Ecological Information

**Aquatic and Terrestrial Toxicity:**
Welding produces fumes and gases that may cause long-term negative effects on the environment if released directly into the atmosphere. Some materials may produce Carbon Dioxide (CO₂) gas if welded with the tungsten electrodes specified in this data sheet. Waste from these tungsten electrodes can be very toxic to aquatic life if not properly disposed of.

**Persistence and Degradability:**
Not available

**Bioaccumulative Potential:**
Not available

**Soil Mobility:**
Not available

---

### Section 13: Disposal Considerations

**NOTE:** Always dispose of waste in accordance with local, state and federal regulations.

**Safe Handling:**
Gloves can be worn when handling used and discarded materials. Product is not harmful as shipped.

**Methods of Disposal:**
Avoid dispersal and contact of spilled material and runoff with soil, waterways, drains and sewers. Packaging and tungsten electrode stubs can be disposed of as general waste or recycled. For larger quantities, be sure to dispose in accordance with local, provincial/state and federal regulations.

---

### Section 14: Transportation Information

As finished product, tungsten electrodes are not subject to special shipping conditions. Thoriated tungsten electrodes may be subject to conditions if shipped in large quantities as Class 7 radioactive materials.

---

### Section 15: Regulatory Information

**WARNING!** This product (EWTh-1 and EWTh-2) contains a chemical (Thorium) known to the State of California to cause cancer.
Thorium Dioxide is a National Toxicology Program known carcinogen.

Massachusetts Substances: Tungsten; Thorium Oxide
New Jersey Hazardous Substances: Tungsten; Thorium Oxide
Pennsylvania Right to Know Hazardous Substances: Tungsten; Thorium Oxide
SARA 302/304/311/312 Hazardous Chemicals: Tungsten; Thorium Oxide
SARA 311/312 Chemical Inventory Hazard Identification: Tungsten – immediate (acute) health hazard, delayed (chronic) health hazard; Thorium Oxide – delayed (chronic) health hazard

Section 16: Other Information
